

## **Farmers' Perception on Climate Change in Nagaland**

A survey tour to Mon district of Nagaland was taken up during 9-12<sup>th</sup> October 2012 under NICRA project. Representative farmers from the three villages *viz.*, Lamponsheanghah, Shangnyu and Longwa were interviewed with the objective to assess their perception towards climate change. It was revealed that the farmers experienced an increase in the mean temperature in the last 10 years, while the annual rainfall decreased with no changes in the agriculture pattern.
