

## **Training organized under AICRP on Tuber Crops**

Three days Training programmed was organized on 6<sup>th</sup> – 8<sup>th</sup> March 2013 at Mawpun village, Ribhoi district, Meghalaya on “Improved Production Technology of Tuber and Rhizomatous Crops” in which presentation and lecture on production and cultivation of different tuber crops like colocasia, sweet potato, amorphophallus was delivered by the scientists from Horticulture Division, ICAR. On farm demonstration on cultivation of Amorphophallus and colocasia was given on the second day of the training programme in which around 21 farmers participated. Planting material and plant protection chemicals were also distributed to all the farmers after the training programme in the presence of Dr.S.V. Ngachan Director ICAR Research Complex for NEH Region, Umiam, and other scientists.
