West Siang, Basar – 791 101

(Changlang)

No: -18/2013-14/Tue

Dated: 11<sup>th</sup> June, 2013

## Weather during the period

- **Rainfall:** -
  - Changlang –NA
  - Miao– 8.7 mm

## Weather Forecast

• <b>Rainfall</b> – Clear warm and dry weather is forecasted for next 3/4 days.
• <b>Temperature</b> - The temperature is likely to be in the range of 20-34°C.
• <b>Relative Humidity</b> - The RH is likely to be in the range of 35-85 %.

## Weather Based Agro-meteorological Advisories Bulletin

Crop	Stage	Pest/Disease	Precautionary Practices to be followed
<b>VEGETABLE CROPS</b>			
<b>Wherever irrigation facility is available, apply protective irrigation to the vegetable crops.</b>			
Cucurbits	Flowering/ Fruiting/ Harvesting	Fruit Fly	<ul style="list-style-type: none"><li>• <b>Mulching with locally available weeds to conserve moisture,</b></li><li>• Interculture operations</li><li>• Collection and deep burying of infected fruit. Installation of pheromone traps.</li><li>• It is advised to avoid allowing fruit to come in direct contact with the soil as it may attract insects and diseases.</li></ul>
Tomato Brinjal	Nursery Transplanting	Damping off	<ul style="list-style-type: none"><li>• Transplanting of mature seedlings maintaining proper moisture level in the soil,</li></ul>
Beans/ French Bean	Fruiting/ Harvesting		<ul style="list-style-type: none"><li>• <b>Mulching with locally available weeds to conserve moisture,</b></li><li>• Light interculture and earthing up,</li></ul>
Ladies Finger	Flowering/ Fruiting		<ul style="list-style-type: none"><li>• Light interculture operations,</li></ul>
<b>FIELD CROPS</b>			
WRC rice- early crop	Transplant	Blast  Yellow stem borer	<ul style="list-style-type: none"><li>• Spraying of crop with Carbandazim 50 WP @ 1 grams per litre of water both in nursery and in main crop is advised,</li><li>• Collection and destruction of egg masses (Yellow cottony mass) is advised. Cut off the tips of the seedlings to kill the egg masses.</li></ul>
Maize	Vegetative/ Cob formation	Cob borer Stem borer	<ul style="list-style-type: none"><li>• Regular monitoring against attack of cob borer,</li><li>• Spraying with</li></ul>
Green gram	Vegetative	Beetle/	<ul style="list-style-type: none"><li>• Spraying with a contact insecticide on a clear day,</li><li>• Interculture operations,</li></ul>
<b>FRUIT CROPS</b>			
Lemon/other citrus fruits	Fruiting Nursery	<b>Trunk Borer</b>  Citrus butterfly	<ul style="list-style-type: none"><li>• <b>In present weather conditions, trunk borer adults can be seen in the tree. Manually collect and destroy the adults,</b></li><li>• Intercropping with any pulse crop is advised,</li><li>• Interculture operations,</li><li>• Bordeaux pasting of the trunk,</li><li>• Hand picking of larvae and its destruction,</li></ul>
<b>LIVESTOCKS</b>			
Livestock	Stage	Disease	Precautionary Practices to be followed
Poultry	All stages	Ranikhet	<ul style="list-style-type: none"><li>• <b>Provide adequate clean drinking water to the birds,</b></li><li>• Provide multivitamin,</li><li>• Proper vaccination with Briben Plus at recommended dose,</li></ul>
Pigs	All stages	Swine fever	<ul style="list-style-type: none"><li>• <b>Wallowing should be encouraged,</b></li><li>• New Born - Provide cushioning material,</li><li>• Vaccination against swine fever,</li></ul>
Cattle	All stages	FMD BQ&HS	<ul style="list-style-type: none"><li>• <b>Provide adequate clean drinking water to the birds,</b></li><li>• Vaccination against FMD,</li></ul>

		Ecto-parasite Digestive problems	<ul style="list-style-type: none"><li>• Regular monitoring,</li><li>• Ruchamax at recommended dose,</li></ul>
