MANIPUR BULLETIN 20th February, 2015

Chandel

Significant past weather for the preceding bi-weekly of	Weather forecast for next five days of Chandel
Imphal - West (17 th to 19 th February, 2015)	(21 st to 25 th February, 2015)
During past three days sky was mainly clear to partly cloudy	
but mainly cloudy during afternoon hours of 18 th & 19 th	There may be rain on Sunday. Sky will be mainly clear to
February. No rainfall was recorded during past three days.	partly cloudy with maximum temp. of 23.0 – 25.0 °C &
Maximum temperature range observed was 20.9 – 26.0 °C,	minimum temp. $8.0 - 9.0$ °C. Relative humidity may reach
range of minimum temperature observed was 4.9 - 8.0 °C,	upto 91 % (max RH) & 38 % (min RH). The average wind
mean relative humidity observed in morning and afternoon	speed may be 4-5 km/ hr during next five days.
were 87.0 % and 44.67 % respectively. The average wind	
speed range was 1.8 – 3.7 km/hr.	

Name of the crop	Stage	Pest and disease infestation	Agro-meteorological advisories
Field Crops]	
Pre-kharif Rice	Land Preparation for nursery		 Prepare nursery bed of 700 m² area, apply well decomposed FYM/ compost @ 1 t/ 700 m² at final leveling. Seed rate is 60-65kg for a hectare. Soaking and incubation of seeds may be started before sowing when minimum temperature reaches 10-12 °C. Land preparation of main field for transplanting rice may be started with rains.
Rabi Maize	Vegetative to pre- flowering	Stem borer	 If the soil is dry, give light irrigation to maintain soil moisture status. Weeding may be done. To control the infestation of stem borer, apply few granules of
		Stelli borei	Carbofuradan 3G at maize whorl.
Rapeseed/ mustard	Siliqua formation to maturity	Pieris brassica	If incidence of Pieris brassica is observed (which bore the pods of rapeseeds of mustard) then spray Coragen @ 2ml/15 lit of water.
			Irrigation is essential at this stage for sustaining favorable condition for seed formation.
Pulses (Field pea/ Lentil)	Fruiting to maturity and harvesting		Retain well filled disease free mature pods for seeds.
Storage			- Dry, clean and store the seeds in RC-seed bins after proper drying of seeds and charcoal. Check for moisture content or weight of seeds. After proper drying, store grains/ seeds in well ventilated godowns.
Horticulture Crops]	
Broad bean	Fruiting to maturity and harvesting		Imidachloprid (Confidor) @ 2 ml per 10 litre of water may be sprayed at 15 days interval to control aphids.
Chilli/ capsicum	Nursery		In chilies and capsicum, spray Carbendazim + Mancozeb (Sixer) @ 2 g per litre of water to control the fungal attack.
Bhindi	Sowing		Land preparation for sowing bhindi may be done. Sowing of bhindi/ladies finger may be done at the spacing of 30cm x 45cm.Apply 25kg urea, 33kg DAP and 25kg MOP per sangam at final stage of land preparation before sowing. Recommended varieties are - Arka Anamika and Pusa Sawani
Tree bean/ Lime/ Lemon/ Khasi Mandarin/ Banana	Land preparation and collection of planting material		 Preparation of pits or field for planting tree bean/ lime/ lemon/ khasi mandarin/ banana may be started. Collect good planting material.

"Integrated Agromet Advisory Services"

Animal Sciences			
Name of the animal	Growth stage	Disease/ infestation	Agro-meteorological advisories
Poultry	All susceptible age	Coccidiosis	Give Coximar @ 2g/lit of drinking water for 5-7 days.
groups (as and when required)	Ranikhet disease	 Birds must be vaccinated as per recommended schedule mentioned below as the probability of occurrence of the disease is high during March- April months. 1. F-1 Strain may be first administered within 7 days of age and second dose may be given at 30days for all birds. 2. R₂B vaccine of 8-9 weeks of age group birds (layers). 3. Killed ND virus vaccine of 16-18 weeks of age group birds (layers). 	
		Gumboro	Vaccinate using one shot IBD vaccine against Gumboro.
		Farm premises management	Keep the farm premises neat and clean using quality disinfectants.
Sheep/ Goat	Above 3 months of age (as and when	Skin infections	- Use Butox liq. @ 2ml/ litres of water and brush the animal using the solution at 15 days interval.
required)	required)	F.M.D.	- Vaccinate against F.M.D.
Pig	Above 3 months of	Hog cholera	- Vaccinate against swine fever after the age of 3 months.
	age (as and when	Skin infection	Give Ivermectin (Indectin tab.) @ 200mg/ kg body weight once only.
	required)	F.M.D.	- Vaccinate against F.M.D.
Cattle / Buffalo/ Mithun Above 3 months of age (as and when required)	age (as and when	Skin infections	 Use Butox liq. @ 2ml/ litres of water and brush the animal using the solution at 15 days interval. * For Mithun, give Ivermectin @ 200 mg per kg body weight at the time of salt feeding.
		Black Quarter/ Haemorhagic	Vaccinate against B.Q./ H.S. using proven vaccine of the diseases mentioned.
		F.M.D.	- Vaccinate against F.M.D.

MANIPUR BULLETIN 20th February, 2015

Thoubal

Significant past weather for the preceding bi-weekly of	Weather forecast for next five days of Thoubal
Imphal - West (17 th to 19 th February, 2015)	(21 st to 25 th February, 2015)
During past three days sky was mainly clear to partly cloudy	
but mainly cloudy during afternoon hours of 18th & 19th	There may be rain on Sunday. Sky will be mainly clear to
February. No rainfall was recorded during past three days.	partly cloudy with maximum temp. of $24.0 - 26.0$ °C &
Maximum temperature range observed was 20.9 – 26.0 °C,	minimum temp. $8.0 - 9.0$ °C. Relative humidity may reach
range of minimum temperature observed was 4.9 - 8.0 °C,	upto 92 % (max RH) & 35 % (min RH). The average wind
mean relative humidity observed in morning and afternoon	speed may be 4-6 km/ hr during next five days.
were 87.0 % and 44.67 % respectively. The average wind	
speed range was 1.8 – 3.7 km/hr.	

Name of the crop	Stage	Pest and disease infestation	Agro-meteorological advisories
Field Crops		J	
Pre-kharif Rice	Land Preparation for nursery		 Prepare nursery bed of 700 m² area, apply well decomposed FYM/ compost @ 1 t/ 700 m² at final leveling. Seed rate is 60-65kg for a hectare. Soaking and incubation of seeds may be started before sowing when minimum temperature reaches 10-12 °C. Land preparation of main field for transplanting rice may be started with rains.
Rabi Maize	Vegetative to pre- flowering	Stem borer	 If the soil is dry, give light irrigation to maintain soil moisture status. Weeding may be done. To control the infestation of stem borer, apply few granules of Carbofuradan 3G at maize whorl.
Rapeseed/ mustard	Siliqua formation to maturity	Pieris brassica	If incidence of Pieris brassica is observed (which bore the pods of rapeseeds of mustard) then spray Coragen @ 2ml/15 lit of water. Irrigation is essential at this stage for sustaining favorable condition for seed formation.
Pulses (Field pea/ Lentil)	Fruiting to maturity and harvesting		Retain well filled disease free mature pods for seeds.
Storage			- Dry, clean and store the seeds in RC-seed bins after proper drying of seeds and charcoal. Check for moisture content or weight of seeds. After proper drying, store grains/ seeds in well ventilated godowns.
Horticulture Crops			
Broad bean	Fruiting to maturity and harvesting		Imidachloprid (Confidor) @ 2 ml per 10 litre of water may be sprayed at 15 days interval to control aphids.
Chilli/ capsicum	Nursery		In chilies and capsicum, spray Carbendazim + Mancozeb (Sixer) @ 2 g per litre of water to control the fungal attack.
