

**MANIPUR AGROMET ADVISORY BULLETIN**Date of issue: 18<sup>th</sup> October, 2019

District: Thoubal

**Past weather for the of Imphal West (15<sup>th</sup> to 17<sup>th</sup> October, 2019):**

**6.6 mm** rainfall was observed during the past three days. The skies remained partly cloudy to mainly cloudy but on 17<sup>th</sup> morning hours were foggy and afternoon was clear. Maximum temperature ranged from 28.3–29.6 °C and minimum of 19.4–19.7 °C. Mean relative humidity of 95.3 % max & 72.3 % min was recorded in the past three days & average wind speed was 1.0–2.2 km/ hr.

**Weather forecast for Thoubal (19<sup>th</sup> to 23<sup>rd</sup> October, 2019):**

Likely to have no rains upto Wednesday. The sky will remain mainly clear to partly cloudy with max. temp. 29-30 °C & mini. temp. 17-18 °C. Relative humidity may reach upto 97 % (max) & 67 % (min). The average wind speed may be 3-6 km/hr.

**General Advisory:**

1. Monitor insect pest in the crop field regularly to reduce loss. Provisions may be taken up to conserve soil moisture. Use water economically to ensure its availability in coming months.
2. Harvest mature crops before rains. Clean and sundry seeds properly before storage. Store seeds in Seed Bin.
3. For the fields where rice had failed due to uneven distribution of rainfall during the growing season, cultivation of Blackgram (Urad dal)/ Lentil (Masoor dal)/ Green gram (Moong dal)/ Lathyrus (Kachari) may be done as contingency crop by the mid of November so as to reduce economic stress of farmers. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.

<b>Field Crops</b>			
<b>Name of the crop</b>	<b>Stage</b>	<b>Pest and disease</b>	<b>Agro-meteorological advisories</b>
<b>Kharif Rice</b>	Grain maturity to harvesting		<ul style="list-style-type: none"> <li>- Drain it out completely 10 days before harvesting.</li> <li>- Harvest rice if 80 % of the spikelet has turned yellow.</li> <li>- Stacking of the harvested panicles for 5-7 days by turning the heap of panicles can help in better threshing.</li> <li>- Harvested crop must be well threshed. Clean and sundry seeds properly before storage.</li> </ul>
<b>Soybean/ Rice Bean</b>	Pod maturity to harvesting		Harvest mature crop, sun-dry it for 2-3 days then thresh. Maintain required moisture content before storage for seed in Seed Bin.
<b>Groundnut</b>	Maturity to harvesting		<ul style="list-style-type: none"> <li>- Harvest the crop when 125 days old (var. ICGS-76) as well as dark tint inside the shell appears.</li> <li>- Make bundles and dry the crops in shade for 2-3 days for curing. Dry it for 4-5 days before storage. Select good quality pods for seeds.</li> </ul>
<b>Rapeseed</b>	Seed collection and sowing		- Procure disease free good variety of crop from a reliable source and treat with Carbendazim @2g/ kg seeds before sowing. In foot-hills and upland area zero tillage rape seed may be sown just after harvesting rice to make full utilization of the residual moisture.
<b>Field pea</b>	Seed collection and land preparation		<ul style="list-style-type: none"> <li>- Procure disease free good variety of crop from a reliable source and treat with Carbendazim @2g/ kg seeds before sowing.</li> <li>- Prepare land for sowing field pea.</li> </ul>
<b>Potato</b>	Land preparation to planting		<ul style="list-style-type: none"> <li>- Land preparation for planting potato may be done as soon as optimum soil moisture for land preparation is attained. Ploughing and planking may be done to attain well pulverized and leveled seed bed. Apply 20-30tons of well decomposed FYM at least two weeks before planting.</li> <li>- Select healthy and pure seeds of high yielding variety, free from insect pest. Treat seeds with 5% Dithane M-45 to 10 min before planting. 30 to 50g tuber seeds may be planted at row to row spacing of 55-60cm and plant to plant spacing of 20-25 cm. Seed rate is 20-25 quintals/ hectare.</li> </ul>
<b>Millet/ Blackgram</b>	Vegetative	Hairy caterpillars	<ul style="list-style-type: none"> <li>- Dichlorovos 76 EC 0.05% (0.6ml/ lit of water) on dry days.</li> <li>- Weeding may be done at 30 days after sowing for proper utilization of nutrients and moisture by the crop and avoid insect pest.</li> </ul>
<b>Seed storage</b>	Post-harvest Management		- For seed purpose store the seeds in <i>RC-Seed Bin</i> after proper drying and cleaning of seeds along with dry charcoal at 80:20 w/w ratios. Check for moisture content or weight of charcoal and dry if required.

**Horticulture Crops**

<b>Name of the crop</b>	<b>Stage</b>	<b>Pest and disease</b>	<b>Agro-meteorological advisories</b>
<b>Tree bean</b>	Trees above 7yrs age/ Bearing plants		Apply (60gm DAP + 10g MOP + 20g Carbofuran 3G) per plant.
<b>Coriander</b>	Land preparation & sowing		- Select area with bright sunshine rich in organic manure for preparing beds. Treat seeds using Dichlorovos @ 1ml/ litre of water 2-3 days before

			sowing to protect seeds from ant and other insects. - Apply 200-250 kg of FYM (@ ½ cart load) in 100 sq. m and mix thoroughly to improve soil fertility. - Seed rate is 100g seeds for 100 sq. m.
Spinach beet (Palak)	Land preparation & sowing		- Well drained soil is best for growing spinach beet. - Avoid damping off by adding Captan 50WP in the soil of bed. Spacing may be maintained at 10cm x 20-25cm apart. - Seed rate is 100-120g/ 100 sq m. If broadcasting is done, double the dose is required.
Onion	Nursery raising		- Prepare raised nursery beds, after sowing it must be covered with paddy straw or gunny bags. These must again be removed after 5-7 days as soon as the seeds germinate.
Broad bean/ Pea/ French bean	Land preparation/ seed collection to sowing		Prepare land for sowing after rains. Procure healthy disease free seeds for sowing. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.
Mango	Appearance of new flush in bearing trees		At this stage, apply 50g Urea + 100g DAP + 40g MOP in the soil 1 ½ feet away from the trunk or plant growth promoting rhizobium bacteria (PGPR) or organic formulation like Jivamrut (Mix 10 kg cowdung + 10 litres cow urine + 2 kg jiggery + 2 kg of pulse grain flour + 1kg of live forest soil in 200 litres of water. Ferment for 5-7 days. Stir the formulation three times a day. Use it for 1 acre with irrigation water.
Animal Sciences			
Name of bird/ animal	Stage	Disease/ Management	Agro-meteorological advisories
Poultry (Chicken/ Duck)	All susceptible age groups	Coccidiosis	Give Coccimar @ 2g/litre of drinking water for 5-7 days along with glucose.
		Deworming	Use Ventrimizole @ 1g in 1 litre of drinking water for 3 days.
Pig	Above 3 months of age	Deworming	Give Morantel citrate tablet (Banminth) @15mg/ kg body weight.
		Ecto-parasite	Use Butox liquid @ 2 ml/ lit of water twice a week while brushing the animal.
		Management	- Treat drinking water with potassium permanganate/ sanitizer. Provide ample ventilation in the shed/ dry bedding. Avoid dampness in sheds.
Cattle	Above 3 months of age	Vaccination	Vaccinate against B.Q., F.M.D. & H.S. if not yet vaccinated.
		Tick	Use Butox liquid @ 2ml/ litre water twice a week while brushing animals.
			Calves should not be allowed to drink milk from mothers if affected by FMD, it affects heart and cause even death of the calves.
		Deworming	De-worm with Nilzan/ Tolzan-F @20-30ml for 100 kg body weight.
Goat	All age groups except three months or below	Deworming	- Give Ranizole suspension @ 3ml/ 10 kg body weight.
		Fascioliosis	Give Tolzan-F @ 15ml orally/ kg b. wt. It must be associated with vitamins like Livozyme @ 50ml twice daily.
Fishery:			
Carp culture	Grow-out	Fish	- Fish harvesting can be started. - Ponds water depth should be maintained at 1.0-1.5m. - Feeds should be provided 1-2 times a day @ 3 % body weight per day. - Well balanced feed fortified with vitamins and minerals should be provided. - Maintain good quality of pond water. - To stock fish for next year above practices may be done in small scale.

<b>Seed storage</b>	Post-harvest Management		- For seed purpose store the seeds in <i>RC-Seed Bin</i> after proper drying and cleaning of seeds along with dry charcoal at 80:20 w/w ratios. Check for moisture content or weight of charcoal and dry if required.
<b>Horticulture Crops</b>			
<b>Name of the crop</b>	<b>Stage</b>	<b>Pest and disease</b>	<b>Agro-meteorological advisories</b>
<b>Tree bean</b>	Trees above 7yrs age/ Bearing plants		Apply (60gm DAP + 10g MOP + 20g Carbofuran 3G) per plant.
<b>Coriander</b>	Land preparation & sowing		- Select area with bright sunshine rich in organic manure for preparing beds. Treat seeds using Dichlorovos @ 1ml/ litre of water 2-3 days before

			sowing to protect seeds from ant and other insects. - Apply 200-250 kg of FYM (@ ½ cart load) in 100 sq. m and mix thoroughly to improve soil fertility. - Seed rate is 100g seeds for 100 sq. m.
<b>Spinach beet (Palak)</b>	Land preparation & sowing		- Well drained soil is best for growing spinach beet. - Avoid damping off by adding Captan 50WP in the soil of bed. Spacing may be maintained at 10cm x 20-25cm apart. - Seed rate is 100-120g/ 100 sq m. If broadcasting is done, double the dose is required.
<b>Onion</b>	Nursery raising		- Prepare raised nursery beds, after sowing it must be covered with paddy straw or gunny bags. These must again be removed after 5-7 days as soon as the seeds germinate.
<b>Broad bean/ Pea/ French bean</b>	Land preparation/ seed collection to sowing		Prepare land for sowing after rains. Procure healthy disease free seeds for sowing. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.
<b>Mango</b>	Appearance of new flush in bearing trees		At this stage, apply 50g Urea + 100g DAP + 40g MOP in the soil 1 ½ feet away from the trunk or plant growth promoting rhizobium bacteria (PGPR) or organic formulation like Jivamrut (Mix 10 kg cowdung + 10 litres cow urine + 2 kg jiggery + 2 kg of pulse grain flour + 1kg of live forest soil in 200 litres of water. Ferment for 5-7 days. Stir the formulation three times a day. Use it for 1 acre with irrigation water.

**Animal Sciences**

Name of bird/ animal	Stage	Disease/ Management	Agro-meteorological advisories
<b>Poultry (Chicken/ Duck)</b>	All susceptible age groups	Coccidiosis	Give Coccimar @ 2g/litre of drinking water for 5-7 days along with glucose.
		Deworming	Use Ventrimezole @ 1g in 1 litre of drinking water for 3 days.
<b>Pig</b>	Above 3 months of age	Deworming	Give Morantel citrate tablet (Banminth) @ 15mg/ kg body weight.
		Ecto-parasite	Use Butox liquid @ 2 ml/ lit of water twice a week while brushing the animal.
		Management	- Treat drinking water with potassium permanganate/ sanitizer. Provide ample ventilation in the shed/ dry bedding. Avoid dampness in sheds.
<b>Cattle</b>	Above 3 months of age	Vaccination	Vaccinate against B.Q., F.M.D. & H.S. if not yet vaccinated.
		Tick	Use Butox liquid @ 2ml/ litre water twice a week while brushing animals.
			Calves should not be allowed to drink milk from mothers if affected by FMD, it affects heart and cause even death of the calves.
		Deworming	De-worm with Nilzan/ Tolzan-F @ 20-30ml for 100 kg body weight.
<b>Goat</b>	All age groups except three months or below	Deworming	- Give Ranizole suspension @ 3ml/ 10 kg body weight.
		Fascioliosis	Give Tolzan-F @ 15ml orally/ kg b. wt. It must be associated with vitamins like Livozyme @ 50ml twice daily.

**Fishery:**

<b>Carp culture</b>	Grow-out	Fish	- Fish harvesting can be started. - Ponds water depth should be maintained at 1.0-1.5m. - Feeds should be provided 1-2 times a day @ 3 % body weight per day. - Well balanced feed fortified with vitamins and minerals should be provided. - Maintain good quality of pond water. - To stock fish for next year above practices may be done in small scale.

**MANIPUR AGROMET ADVISORY BULLETIN**Date of issue: 18<sup>th</sup> October, 2019*District: Churachandpur***Past weather for the of Imphal West (15<sup>th</sup> to 17<sup>th</sup> October, 2019):**

**6.6 mm** rainfall was observed during the past three days. The skies remained partly cloudy to mainly cloudy but on 17<sup>th</sup> morning hours were foggy and afternoon was clear. Maximum temperature ranged from 28.3–29.6 °C and minimum of 19.4–19.7 °C. Mean relative humidity of 95.3 % max & 72.3 % min was recorded in the past three days & average wind speed was 1.0–2.2 km/ hr.

**Weather forecast for Churachandpur (19<sup>th</sup> to 23<sup>rd</sup> October, 2019):**

Likely to have no rains upto Wednesday. The sky will remain mainly clear to partly cloudy with max. temp. 29-30 °C & mini. temp. 17-18 °C. Relative humidity may reach upto 98 % (max) & 57 % (min). The average wind speed may be 3-4 km/hr.

**General Advisory:**

1. Monitor insect pest in the crop field regularly to reduce loss. Provisions may be taken up to conserve soil moisture. Use water economically to ensure its availability in coming months.
2. Harvest mature crops before rains. Clean and sundry seeds properly before storage. Store seeds in Seed Bin.
3. For the fields where rice had failed due to uneven distribution of rainfall during the growing season, cultivation of Blackgram (Urad dal)/ Lentil (Masoor dal)/ Green gram (Moong dal)/ Lathyrus (Kachari) may be done as contingency crop by the mid of November so as to reduce economic stress of farmers. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.

<b>Field Crops</b>			
<b>Name of the crop</b>	<b>Stage</b>	<b>Pest and disease</b>	<b>Agro-meteorological advisories</b>
<b>Kharif Rice</b>	Grain maturity to harvesting		<ul style="list-style-type: none"> <li>- Drain it out completely 10 days before harvesting.</li> <li>- Harvest rice if 80 % of the spikelet has turned yellow.</li> <li>- Stacking of the harvested panicles for 5-7 days by turning the heap of panicles can help in better threshing.</li> <li>- Harvested crop must be well threshed. Clean and sundry seeds properly before storage.</li> </ul>
<b>Soybean/ Rice Bean</b>	Pod maturity to harvesting		Harvest mature crop, sun-dry it for 2-3 days then thresh. Maintain required moisture content before storage for seed in Seed Bin.
<b>Groundnut</b>	Maturity to harvesting		<ul style="list-style-type: none"> <li>- Harvest the crop when 125 days old (var. ICGS-76) as well as dark tint inside the shell appears.</li> <li>- Make bundles and dry the crops in shade for 2-3 days for curing. Dry it for 4-5 days before storage. Select good quality pods for seeds.</li> </ul>
<b>Rapeseed</b>	Seed collection and sowing		- Procure disease free good variety of crop from a reliable source and treat with Carbendazim @2g/ kg seeds before sowing. In foot-hills and upland area zero tillage rape seed may be sown just after harvesting rice to make full utilization of the residual moisture.
<b>Field pea</b>	Seed collection and land preparation		<ul style="list-style-type: none"> <li>- Procure disease free good variety of crop from a reliable source and treat with Carbendazim @2g/ kg seeds before sowing.</li> <li>- Prepare land for sowing field pea.</li> </ul>
<b>Potato</b>	Land preparation to planting		<ul style="list-style-type: none"> <li>- Land preparation for planting potato may be done as soon as optimum soil moisture for land preparation is attained. Ploughing and planking may be done to attain well pulverized and leveled seed bed. Apply 20-30tons of well decomposed FYM at least two weeks before planting.</li> <li>- Select healthy and pure seeds of high yielding variety, free from insect pest. Treat seeds with 5% Dithane M-45 to 10 min before planting. 30 to 50g tuber seeds may be planted at row to row spacing of 55-60cm and plant to plant spacing of 20-25 cm. Seed rate is 20-25 quintals/ hectare.</li> </ul>
<b>Millet/ Blackgram</b>	Vegetative	Hairy caterpillars	<ul style="list-style-type: none"> <li>- Dichlorovos 76 EC 0.05% (0.6ml/ lit of water) on dry days.</li> <li>- Weeding may be done at 30 days after sowing for proper utilization of nutrients and moisture by the crop and avoid insect pest.</li> </ul>
<b>Seed storage</b>	Post-harvest Management		- For seed purpose store the seeds in <i>RC-Seed Bin</i> after proper drying and cleaning of seeds along with dry charcoal at 80:20 w/w ratios. Check for moisture content or weight of charcoal and dry if required.
<b>Horticulture Crops</b>			
<b>Name of the crop</b>	<b>Stage</b>	<b>Pest and disease</b>	<b>Agro-meteorological advisories</b>

District: Senapati

**Past weather for the of Imphal West (15<sup>th</sup> to 17<sup>th</sup> October, 2019):**

6.6 mm rainfall was observed during the past three days. The skies remained partly cloudy to mainly cloudy but on 17<sup>th</sup> morning hours were foggy and afternoon was clear. Maximum temperature ranged from 28.3–29.6 °C and minimum of 19.4–19.7 °C. Mean relative humidity of 95.3 % max & 72.3 % min was recorded in the past three days & average wind speed was 1.0–2.2 km/hr.

**Weather forecast for Senapati (19<sup>th</sup> to 23<sup>rd</sup> October, 2019):**

Likely to have no rains upto Wednesday. The sky will remain mainly clear to partly cloudy with max. temp. 26-27 °C & mini. temp. 14-15 °C. Relative humidity may reach upto 98 % (max) & 58 % (min). The average wind speed may be 4 km/hr.

**General Advisory:**

1. Monitor insect pest in the crop field regularly to reduce loss. Provisions may be taken up to conserve soil moisture. Use water economically to ensure its availability in coming months.
2. Harvest mature crops before rains. Clean and sundry seeds properly before storage. Store seeds in Seed Bin.
3. For the fields where rice had failed due to uneven distribution of rainfall during the growing season, cultivation of Blackgram (Urad dal)/ Lentil (Masoor dal)/ Green gram (Moong dal)/ Lathyrus (Kachari) may be done as contingency crop by the mid of November so as to reduce economic stress of farmers. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.

Field Crops			
Name of the crop	Stage	Pest and disease	Agro-meteorological advisories
Kharif Rice	Grain maturity to harvesting		<ul style="list-style-type: none"> <li>- Drain it out completely 10 days before harvesting.</li> <li>- Harvest rice if 80 % of the spikelet has turned yellow.</li> <li>- Stacking of the harvested panicles for 5-7 days by turning the heap of panicles can help in better threshing.</li> <li>- Harvested crop must be well threshed. Clean and sundry seeds properly before storage.</li> </ul>
Soybean/ Rice Bean	Pod maturity to harvesting		Harvest mature crop, sun-dry it for 2-3 days then thresh. Maintain required moisture content before storage for seed in Seed Bin.
Groundnut	Maturity to harvesting		<ul style="list-style-type: none"> <li>- Harvest the crop when 125 days old (var. ICGS-76) as well as dark tint inside the shell appears.</li> <li>- Make bundles and dry the crops in shade for 2-3 days for curing. Dry it for 4-5 days before storage. Select good quality pods for seeds.</li> </ul>
Rapeseed	Seed collection and sowing		- Procure disease free good variety of crop from a reliable source and treat with Carbendazim @2g/ kg seeds before sowing. In foot-hills and upland area zero tillage rape seed may be sown just after harvesting rice to make full utilization of the residual moisture.
Field pea	Seed collection and land preparation		<ul style="list-style-type: none"> <li>- Procure disease free good variety of crop from a reliable source and treat with Carbendazim @2g/ kg seeds before sowing.</li> <li>- Prepare land for sowing field pea.</li> </ul>
Millet/ Blackgram	Vegetative	Hairy caterpillars	<ul style="list-style-type: none"> <li>- Dichlorovos 76 EC 0.05% (0.6ml/ lit of water) on dry days.</li> <li>- Weeding may be done at 30 days after sowing for proper utilization of nutrients and moisture by the crop and avoid insect pest.</li> </ul>
Seed storage	Post-harvest Management		- For seed purpose store the seeds in RC-Seed Bin after proper drying and cleaning of seeds along with dry charcoal at 80:20 w/w ratios. Check for moisture content or weight of charcoal and dry if required.
Horticulture Crops			
Name of the crop	Stage	Pest and disease	Agro-meteorological advisories
Tree bean	Trees above 7yrs age/ Bearing plants		Apply (60gm DAP + 10g MOP + 20g Carbofuran 3G) per plant.
Coriander	Land preparation & sowing		<ul style="list-style-type: none"> <li>- Select area with bright sunshine rich in organic manure for preparing beds. Treat seeds using Dichlorovos @ 1ml/ litre of water 2-3 days before sowing to protect seeds from ant and other insects.</li> <li>- Apply 200-250 kg of FYM (@ ½ cart load) in 100 sq. m and mix thoroughly to improve soil fertility.</li> <li>- Seed rate is 100g seeds for 100 sq. m.</li> </ul>
Spinach beet (Palak)	Land preparation & sowing		<ul style="list-style-type: none"> <li>- Well drained soil is best for growing spinach beet.</li> <li>- Avoid damping off by adding Captan 50WP in the soil of bed. Spacing may be maintained at 10cm x 20-25cm apart.</li> <li>- Seed rate is 100-120g/ 100 sq m. If broadcasting is done, double the dose</li> </ul>

			is required.
<b>Onion</b>	Nursery raising		- Prepare raised nursery beds, after sowing it must be covered with paddy straw or gunny bags. These must again be removed after 5-7 days as soon as the seeds germinate.
<b>Broad bean/ Pea/ French bean</b>	Land preparation/ seed collection to sowing		Prepare land for sowing after rains. Procure healthy disease free seeds for sowing. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.
<b>Mango</b>	Appearance of new flush in bearing trees		At this stage, apply 50g Urea + 100g DAP + 40g MOP in the soil 1 ½ feet away from the trunk or plant growth promoting rhizobium bacteria (PGPR) or organic formulation like Jivamrut (Mix 10 kg cowdung + 10 litres cow urine + 2 kg jiggery + 2 kg of pulse grain flour + 1kg of live forest soil in 200 litres of water. Ferment for 5-7 days. Stir the formulation three times a day. Use it for 1 acre with irrigation water.

**Animal Sciences**

Name of bird/ animal	Stage	Disease/ Management	Agro-meteorological advisories
<b>Poultry (Chicken/ Duck)</b>	All susceptible age groups	Coccidiosis	Give Coccimar @ 2g/litre of drinking water for 5-7 days along with glucose.
		Deworming	Use Ventrimizole @ 1g in 1 litre of drinking water for 3 days.
<b>Pig</b>	Above 3 months of age	Deworming	Give Morantel citrate tablet (Banminth) @15mg/ kg body weight.
		Ecto-parasite	Use Butox liquid @ 2 ml/ lit of water twice a week while brushing the animal.
		Management	- Treat drinking water with potassium permanganate/ sanitizer. Provide ample ventilation in the shed/ dry bedding. Avoid dampness in sheds.
<b>Cattle</b>	Above 3 months of age	Vaccination	Vaccinate against B.Q., F.M.D. & H.S. if not yet vaccinated.
		Tick	Use Butox liquid @ 2ml/ litre water twice a week while brushing animals.
			Calves should not be allowed to drink milk from mothers if affected by FMD, it affects heart and cause even death of the calves.
<b>Goat</b>	All age groups except three months or below	Deworming	De-worm with Nilzan/ Tolzan-F @20-30ml for 100 kg body weight.
		Fascioliosis	- Give Ranizole suspension @ 3ml/ 10 kg body weight. Give Tolzan-F @ 15ml orally/ kg b. wt. It must be associated with vitamins like Livozyme @ 50ml twice daily.

**Fishery:**

<b>Carp culture</b>	Grow-out	Fish	<ul style="list-style-type: none"> <li>- Fish harvesting can be started.</li> <li>- Ponds water depth should be maintained at 1.0-1.5m.</li> <li>- Feeds should be provided 1-2 times a day @ 3 % body weight per day.</li> <li>- Well balanced feed fortified with vitamins and minerals should be provided.</li> <li>- Maintain good quality of pond water.</li> <li>- To stock fish for next year above practices may be done in small scale.</li> </ul>

**MANIPUR AGROMET ADVISORY BULLETIN**Date of issue: 18<sup>th</sup> October, 2019

District: Tamenglong

**Past weather for the of Imphal West (15<sup>th</sup> to 17<sup>th</sup> October, 2019):**

**6.6 mm** rainfall was observed during the past three days. The skies remained partly cloudy to mainly cloudy but on 17<sup>th</sup> morning hours were foggy and afternoon was clear. Maximum temperature ranged from 28.3–29.6 °C and minimum of 19.4–19.7 °C. Mean relative humidity of 95.3 % max & 72.3 % min was recorded in the past three days & average wind speed was 1.0–2.2 km/ hr.

**Weather forecast for Tamenglong (19<sup>th</sup> to 23<sup>rd</sup> October, 2019):**

Likely to have no rains upto Wednesday. The sky will remain mainly clear to partly cloudy with max. temp. 27-28 °C & mini. temp. 15-16 °C. Relative humidity may reach upto 96 % (max) & 54 % (min). The average wind speed may be 3-4 km/hr.

**General Advisory:**

1. Monitor insect pest in the crop field regularly to reduce loss. Provisions may be taken up to conserve soil moisture. Use water economically to ensure its availability in coming months.
2. Harvest mature crops before rains. Clean and sundry seeds properly before storage. Store seeds in Seed Bin.
3. For the fields where rice had failed due to uneven distribution of rainfall during the growing season, cultivation of Blackgram (Urad dal)/ Lentil (Masoor dal)/ Green gram (Moong dal)/ Lathyrus (Kachari) may be done as contingency crop by the mid of November so as to reduce economic stress of farmers. Treat seeds with Carbendazim @ 2g/ kg seeds before sowing.

<b>Field Crops</b>			
<b>Name of the crop</b>	<b>Stage</b>	<b>Pest and disease</b>	<b>Agro-meteorological advisories</b>
<b>Kharif Rice</b>	Grain maturity to harvesting		<ul style="list-style-type: none"> <li>- Drain it out completely 10 days before harvesting.</li> <li>- Harvest rice if 80 % of the spikelet has turned yellow.</li> <li>- Stacking of the harvested panicles for 5-7 days by turning the heap of panicles can help in better threshing.</li> <li>- Harvested crop must be well threshed.
