Mizoram Centre, Kolasib- 796081, MIZORAM

(Prepared based on District wise Weather Forecast received from IMD, Guwahati)

			<ul style="list-style-type: none"> Keep dry fruits in sun for drying and store for next year
Brinjal	Harvesting stage	KOLASIB	<ul style="list-style-type: none"> Apply insecticide like imidacloprid 0.5 ml or phosolone 1.5 ml or acephate 1.0 g or dimethoate 2 ml/lt of water.
Tomato	Vegetative stage	AIZAWL CHAMPAI SERCHHIP	<ul style="list-style-type: none"> Harvest all mature fruit. Keep over mature fruit for seed production. Extract seeds from full ripened or over matured fruit. Keep extracted for sun dry and keep for next year.
		LUNGLEI	<ul style="list-style-type: none"> Light hoeing and hand weeding is required to remove weeds and loosen the soil for better aeration and root development. Earthing up should also be done after 30 and 45 days of planting. Staking is very important to support the plants to get more yields and quality should be done after one month of planting. Mulching with black polythene film reduces weed growth, increase crop growth, early bearing and total yield.
		Bacterial wilt LUNGLEI	<ul style="list-style-type: none"> Uproot all infected plant and burn it. This disease can be minimized by practicing crop rotation. Soil drenching with Bordeaux mixture (1:1:100) after one month of planting is effective method to manage this disease.
Early Cole crop	Vegetative stage	LAWNGTLAI SAIHA	<ul style="list-style-type: none"> Light hoeing and hand weeding is required to remove weeds and loosen the soil for better aeration and root development. To produce compact head, the plant should be earthing up 4-5 weeks after transplanting. Water should be applied at every week interval.
