Min Temp (ºC)	12	14	13	13	13
Cloud Coverage	Mainly cloudy	Mainly cloudy	Mainly cloudy	Partially clear	Partially clear
Max RH (%)	96	97	94	98	98
Min RH (%)	69	62	68	61	57
Wind Speed (KmpH)	2	4	2	2	2
*Wind Direction	E	S-E	S-E	S-E	E

Northerly- N, North-Easterly- N-E, Easterly- E, South-Easterly- S-E, Southerly- S, South-Westerly- S-W, Westerly-W, North-westerly- N-W.

Status of Pre Monsoon- May 1-31, 2018 (*Percent of deviation from normal in parenthesis*)

Aizawl- 383.68mm (341.8mm)	Champhai- 239.49mm (250.30mm)	Saiha- 109.52 mm (87.2mm)	Kolasib- 352.38mm (380.9mm)
Lawngtlai-321.51mm (285.5mm)	Lunglei-344.00mm (186.21mm)	Mamit-449.48mm (442.80mm)	Serchhip-411.72mm (259.8mm)

Weather summary of the past three days

Maximum Tem. (ºC): 27-29ºC
Minimum Tem. (ºC): 17-19ºC
Maximum RH (%): 92-98%
Minimum RH (%): 86-91%
Wind Direction: Southeasterly
Cloud cover: Mainly cloudy
Wind speed: 3.02 km/hr

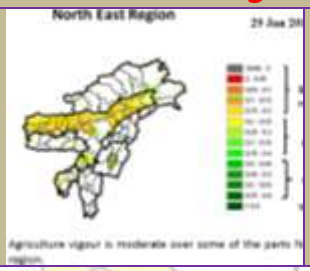
Rainfall: 75.6 mm

Weather forecast valid from 30th June, 2018 To 04th July, 2018.

There are chances of moderate to light and heavy rainfall during the next 5 days. The maximum and minimum temperatures for the next 5 days may range for 30-32ºC and 12-14ºC. Maximum relative humidity is expected in the range of 94-98% and minimum may from 57-69%. Wind direction would be easterly to southeasterly and easterly with the wind speed of 2-4 km per hour. Mainly cloudy sky will prevail during the next five days.

Weekly cumulative rainfall: **109.0 mm**

NDVI for Mizoram



Mildly dry condition occurs in all districts of Mizoram.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ✦ The young fruit plant must be irrigated at weekly interval for better establishment. ✦ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Start planting newly established place. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternative day. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant ✦ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Provide split doses of urea (70g/pt) at the time of full blooming. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ Don't use split dose of any nitrogenous fertilizer for better growth. ➢ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Don't use split dose of any nitrogenous

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av • oid fungal growth that releases aflatoxin which could lead to mortality of fish. • Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. • Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. • Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. • **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. • Potting mixture of soil, sand and FYM or compost should be in proper ratio. • Application of split dose of fertilizer 600: 200:100 (g/pt). • Only certified seed should be used. • Stagnation of water in beds should be avoided. • In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. • Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	• **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. • **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. • **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		• If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ✦ The young fruit plant must be irrigated at weekly interval for better establishment. ✦ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Start planting newly established place. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternative day. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant ✦ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Provide split doses of urea (70g/pt) at the time of full blooming. ✦ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ✦ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ✦ Don't use split dose of any nitrogenous fertilizer for better growth. ✦ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	✦ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av - oid fungal growth that releases aflatoxin which could lead to mortality of fish. - Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. - Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. - Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

GRAMIN KRISHI MAUSAM SEWA

ICAR RESEARCH COMPLEX FOR NEH REGION

Mizoram Centre, Kolasib- 796081, MIZORAM

(Prepared based on District wise Weather Forecast received from IMD, Guwahati)

District: Mamit **Period:** 30 June – 04 July, 2018

Bulletin No: - 803/2018/ Bulletin/English **Date of issue:** 29th June, 2018

Parameters	30.06.2018	01.07.2018	02.07.2018	03.07.2018	04.07.2018
Rainfall (mm)	15	21	8	7	5
Max Temp (ºC)	31	31	30	31	32
Min Temp (ºC)	25	24	23	23	23
Cloud Coverage	Mainly cloudy	Mainly cloudy	Mainly cloudy	Partially clear	Partially clear
Max RH (%)	99	99	98	100	100
Min RH (%)	67	75	66	59	51
Wind Speed (KmpH)	2	2	2	4	4
*Wind Direction	E	E	S-E	S	S

Northerly- N, North-Easterly- N-E, Easterly- E, South-Easterly- S-E, Southerly- S, South-Westerly- S-W, Westerly-W, North-westerly- N-W.

Status of Pre Monsoon- May 1-31, 2018 (*Percent of deviation from normal in parenthesis*)

Aizawl- 383.68mm (341.8mm)	Champhai- 239.49mm (250.30mm)	Saiha- 109.52 mm (87.2mm)	Kolasib- 352.38mm (380.9mm)
Lawngtlai-321.51mm (285.5mm)	Lunglei-344.00mm (186.21mm)	Mamit-449.48mm (442.80mm)	Serchhip-411.72mm (259.8mm)

Weather summary of the past three days	Weather forecast valid from 30thJune, 2018 To 04th July, 2018.
Maximum Tem. (ºC):26-29ºC **Minimum Tem. (ºC):**21-22ºC **Maximum RH (%):**99-100% **Minimum RH (%):**85-92% **Wind Direction:** Southeasterly **Cloud cover:** Mainly cloudy **Wind speed:** 3.45 km/hr **Rainfall:** 91.6 mm	There are chances of moderate to light rainfall during the next 5 days. The maximum and minimum temperatures for the next 5 days may range for 30-32ºC and 23-25ºC. Maximum relative humidity is expected in the range of 98-100% and minimum may from 51-75%. Wind direction would be easterly to southeasterly and southerly with the wind speed of 2-4 km per hour. Mainly cloudy sky will prevail during the next five days. ***Weekly cumulative rainfall:*** **56.0 mm**
NDVI for Mizoram	 Mildly dry condition occurs in all districts of Mizoram.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ✦ The young fruit plant must be irrigated at weekly interval for better establishment. ✦ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Start planting newly established place. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternative day. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant ✦ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Provide split doses of urea (70g/pt) at the time of full blooming. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ Don't use split dose of any nitrogenous fertilizer for better growth. ➢ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Don't use split dose of any nitrogenous

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av oid fungal growth that releases aflatoxin which could lead to mortality of fish. Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ✦ The young fruit plant must be irrigated at weekly interval for better establishment. ✦ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Start planting newly established place. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternative day. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant ✦ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Cucurbitaceous crop	**Fruiting stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Provide split doses of urea (70g/pt) at the time of full blooming. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ Don't use split dose of any nitrogenous fertilizer for better growth. ➢ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Don't use split dose of any nitrogenous

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av oid fungal growth that releases aflatoxin which could lead to mortality of fish. Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ✦ The young fruit plant must be irrigated at weekly interval for better establishment. ✦ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Start planting newly established place. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternative day. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant ✦ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Provide split doses of urea (70g/pt) at the time of full blooming. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ Don't use split dose of any nitrogenous fertilizer for better growth. ➢ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Don't use split dose of any nitrogenous

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av oid fungal growth that releases aflatoxin which could lead to mortality of fish. Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

ICAR RESEARCH COMPLEX FOR NEH REGION

Mizoram Centre, Kolasib- 796081, MIZORAM

(Prepared based on District wise Weather Forecast received from IMD, Guwahati)

District: Aizawl **Period:** 30 June – 04 July, 2018

Bulletin No: - 803/2018/ Bulletin/English **Date of issue:** 29th June, 2018

Parameters	30.06.2018	01.07.2018	02.07.2018	03.07.2018	04.07.2018
Rainfall (mm)	28	21	14	7	10
Max Temp (ºC)	30	30	30	31	32
Min Temp (ºC)	12	14	13	13	13
Cloud Coverage	Mainly cloudy	Mainly cloudy	Mainly cloudy	Partially clear	Partially clear
Max RH (%)	100	99	99	100	100
Min RH (%)	71	74	71	63	56
Wind Speed (KmpH)	2	2	2	2	3
*Wind Direction	E	E	S-E	S	S-W

Northerly- N, North-Easterly- N-E, Easterly- E, South-Easterly- S-E, Southerly- S, South-Westerly- S-W, Westerly-W, North-westerly- N-W.

Status of Pre Monsoon- May 1-31, 2018 (*Percent of deviation from normal in parenthesis*)

Aizawl- 383.68mm (341.8mm)	Champhai- 239.49mm (250.30mm)	Saiha- 109.52 mm (87.2mm)	Kolasib- 352.38mm (380.9mm)
Lawngtlai-321.51mm (285.5mm)	Lunglei-344.00mm (186.21mm)	Mamit-449.48mm (442.80mm)	Serchhip-411.72mm (259.8mm)

Weather summary of the past three days	Weather forecast valid from 30thJune, 2018 To 04th July, 2018.
Maximum Tem. (ºC):25-28ºC **Minimum Tem. (ºC):**17-18ºC **Maximum RH (%):**91-99% **Minimum RH (%):**68-86% **Wind Direction:** Southeasterly **Cloud cover:** Mainly cloudy **Wind speed:** 3.46 km/hr **Rainfall:** 44.2 mm	There are chances of moderate to light and heavy rainfall during the next 5 days. The maximum and minimum temperatures for the next 5 days may range for 30-32ºC and 12-14ºC. Maximum relative humidity is expected in the range of 99-100% and minimum may from 56-74%. Wind direction would be easterly to southeasterly to southerly and southwesterly with the wind speed of 2-3 km per hour. Manly cloudy sky will prevail during the next five days. ***Weekly cumulative rainfall:*** **80.0 mm**
NDVI for Mizoram	 Mildly dry condition occurs in all districts of Mizoram.

Phone: +91 3837 220041, Fax: +91 3837 220560,

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			▪ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ▪ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ▪ The young fruit plant must be irrigated at weekly interval for better establishment. ▪ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ▪ Start planting newly established place. ▪ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ▪ Provide irrigation every alternative day. ▪ Basin clearing of all plant. ▪ Rain cap can use for tapping plant ▪ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ▪ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ▪ Provide irrigation every alternate day or use straw mulch. ▪ Basin clearing of all plant. ▪ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Provide split doses of urea (70g/pt) at the time of full blooming. ✦ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ✦ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ✦ Don't use split dose of any nitrogenous fertilizer for better growth. ✦ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	✦ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av oid fungal growth that releases aflatoxin which could lead to mortality of fish. Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Status of Pre Monsoon- May 1-31, 2018 (*Percent of deviation from normal in parenthesis*)

Aizawl- 383.68mm (341.8mm) Champhai- 239.49mm (250.30mm) Saiha- 109.52 mm (87.2mm) Kolasib- 352.38mm (380.9mm)

Lawngtlai-321.51mm (285.5mm) Lunglei-344.00mm (186.21mm) Mamit-449.48mm (442.80mm) Serchhip-411.72mm (259.8mm)

Weather summary of the past three days

Maximum Tem. (ºC): 25-29ºC
Minimum Tem. (ºC): 18-19ºC
Maximum RH (%): 93-98%
Minimum RH (%): 72-91%
Wind Direction: Southeasterly
Cloud cover: Mainly coudy
Wind speed: 3.23 km/hr

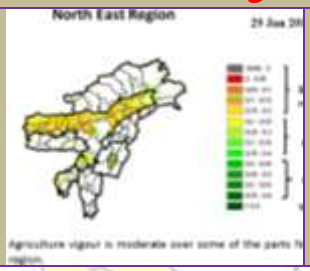
Rainfall: 38.2 mm

Weather forecast valid from 30thJune, 2018 To 04th July, 2018.

There are chances of moderate to light and heavy rainfall during the next 5 days. The maximum and minimum temperatures for the next 5 days may range for 22-23ºC and 14-15ºC. Maximum relative humidity is expected in the range of 100% and minimum may from 64-82%. Wind direction would be southwesterly to southerly with the wind speed of 0-2 km per hour. Mainly cloudy sky will prevail during the next five days.

Weekly cumulative rainfall: **120.0 mm**

NDVI for Mizoram



Mildly dry condition occurs in all districts of Mizoram.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ✦ The young fruit plant must be irrigated at weekly interval for better establishment. ✦ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Start planting newly established place. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternative day. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant ✦ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. ✦ Basin clearing of all plant. ✦ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Provide split doses of urea (70g/pt) at the time of full blooming. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ➢ Don't use split dose of any nitrogenous fertilizer for better growth. ➢ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	➢ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		➢ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ➢ Earthing up soil for better growth and stability in root zone. ➢ Don't use split dose of any nitrogenous

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			feed - Provide 10-30 ml of vitamin B-Complex in feed - 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. - Separate sick animals. - The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. - Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		- Provide preventive dose of anti-coccidial drugs to poultry. - Proper ventilation of shed. - Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water - Avoid overcrowding. - Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. - Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. - Remove wet litter.
FISHERY			
	Monitoring of fish in pond		- Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. - Fish feed should be stored in cool and

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			dry place to av • oid fungal growth that releases aflatoxin which could lead to mortality of fish. • Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. • Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. • Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

GRAMIN KRISHI MAUSAM SEWA

ICAR RESEARCH COMPLEX FOR NEH REGION

Mizoram Centre, Kolasib- 796081, MIZORAM

(Prepared based on District wise Weather Forecast received from IMD, Guwahati)

District: Kolasib **Period:** 30 June – 04 July, 2018

Bulletin No: - 803/2018/ Bulletin/English **Date of issue:** 29th June, 2018

Parameters	30.06.2018	01.07.2018	02.07.2018	03.07.2018	04.07.2018
Rainfall (mm)	50	13	14	11	11
Max Temp (ºC)	30	28	28	29	31
Min Temp (ºC)	16	16	16	17	17
Cloud Coverage	Mainly cloudy	Mainly cloudy	Mainly cloudy	Partially clear	Mainly cloudy
Max RH (%)	100	100	100	100	100
Min RH (%)	75	84	77	71	51
Wind Speed (KmpH)	2	2	2	2	2
*Wind Direction	E	N-E	S-E	S-E	S-W

Northerly- N, North-Easterly- N-E, Easterly- E, South-Easterly- S-E, Southerly- S, South-Westerly- S-W, Westerly-W, North-westerly- N-W.

Status of Pre Monsoon- May 1-31, 2018 (*Percent of deviation from normal in parenthesis*)

Aizawl- 383.68mm (341.8mm) Champhai- 239.49mm (250.30mm) Saiha- 109.52 mm (87.2mm) Kolasib- 352.38mm (380.9mm)

Lawngtlai-321.51mm (285.5mm) Lunglei-344.00mm (186.21mm) Mamit-449.48mm (442.80mm) Serchhip-411.72mm (259.8mm)

Weather summary of the past three days

Maximum Tem. (ºC):27-29ºC
Minimum Tem. (ºC):21ºC
Maximum RH (%):91-96%
Minimum RH (%):80-95%
Wind Direction: Southeasterly
Cloud cover: Mainly cloudy
Wind speed: 3.81 km/hr

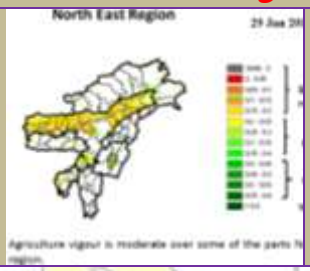
Rainfall: 102.5 mm

Weather forecast valid from 30thJune, 2018 To 04th July, 2018.

There are chances of moderate to heavy rainfall during the next 5 days. The maximum and minimum temperatures for the next 5 days may range for 28-31ºC and 16-17ºC. Maximum relative humidity is expected in the range of 100% and minimum may from 51-84%. Wind direction would be southerly to northeasterly to southeasterly and southwesterly with the wind speed of 2 km per hour. Mainly cloudy sky will prevail during the next five days.

Weekly cumulative rainfall: **99.0 mm**

NDVI for Mizoram



Mildly dry condition occurs in all districts of Mizoram.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Nursery and gap filling stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. - **By seeds:** Seed should be sown in the nursery immediately after extraction in to a depth 1.5 to 2 cm extraction at 10x5 cm distance. Seedlings are planted in secondary bed or polythene bags at 4-6 leaf stages. Water must b provide every alternate days. - Potting mixture of soil, sand and FYM or compost should be in proper ratio. - Application of split dose of fertilizer 600: 200:100 (g/pt). - Only certified seed should be used. - Stagnation of water in beds should be avoided. - In the citrus belt, trees can be planted at any time; however, pre-monsoon is the best time for transplant or gap filling. - Standard-size trees should be spaced 12 to 25 feet apart and dwarf trees should be set 6 to 10 feet apart. The exact distance depends on the variety. The bigger the fruit, the farther the distance.
		Gummosis, citrus Canker, Citrus greening, Dieback, Lamon butterfly and leaf minor	- **Lamon butterfly-** Spray monocrotophos @0.04% @1.2 ml/lt of water. - **Leaf minor-** Spray confidor 0.05% (0.5 ml/lit of water) at each flush emergence. - **Citrus Canker-** Apply bacterimycin @0.6 g/lt of water.
PLANTATION CROP			
COFFEE	**Blooming stage**		- If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			▪ Irrigation of plants at alternate day's interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ▪ Mulching should be done with dry grasses near the tree base to conserve soil moisture during winter. ▪ The young fruit plant must be irrigated at weekly interval for better establishment. ▪ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Nursery stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ▪ Start planting newly established place. ▪ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ▪ Provide irrigation every alternative day. ▪ Basin clearing of all plant. ▪ Rain cap can use for tapping plant ▪ Start intercropping in newly established orchard.
Oil plam	**Vegetative/ Harvesting stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly.. ▪ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ▪ Provide irrigation every alternate day or use straw mulch. ▪ Basin clearing of all plant. ▪ Rain cap can use for tapping plant

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			❖ Start intercropping in newly established orchard. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
Passion Fruit	**Transplanting stage**		✦ High yielding mother vine with good quality fruits and free of virus diseases should be selected to provide cuttings. ✦ A cutting should contain at least 3 buds and must be planted in sand beds. ✦ 10-12 kg of well rotten organic manure and 225 gm rock phosphate should be apply at time of planting to each pit as basal dose application. ✦ Provide irrigation every alternate day or use straw mulch. **Grafting:** ✦ The root stock of yellow Passion fruit is planted in polythene sleeves and the section from Rahangala hybrid is grafted using wedge or approach method of grafting. ✦ Provide irrigation every alternate day or use straw mulch.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Use split dose of any nitrogenous fertilizer for better growth.
Maize	**Sowing stage**		✦ Two to three plough are necessary to get the soil well pulverized and weed free. ✦ Seed is being placed in furrows. ✦ Seed should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (20-25 kg/ha)

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			for desire plant population. Apply well decomposed FYM @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage. Provide irrigation or use straw mulch for better germination.
Kharif Rice	**Nursery stage**		Use only Well filled and healthy seeds. Put the seed in 2.5% salt solution i.e 250 g of common salt in 10 lts of water. Seed treated with Bavistin 50 WP @ 0.1% (2 g/lt) solution. Mulching is requiring for better germination in nursery.
***Jhum* Rice**	**Vegetative stage**		According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. Earthing up soil for better growth and stability in root zone. Use split dose of any nitrogenous fertilizer for better growth.
Kharif pulses (Green gram, Black gram and Rajma)	**Sowing stage**		Land preparation or sowing in pits Inorganic fertilizer like Urea, SSP and MOP @ 20: 60: 40 kg. Use PSB 2g/kg for better germination.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		Rhizome should be treated with Thiram @4 g/kg seed. Use optimum seed rate (50-60 kg/ha) for desire plant population. Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cucurbitaceous crop	**Fruiting stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Provide split doses of urea (70g/pt) at the time of full blooming. ✦ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ✦ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation against fruit fly and pumpkin beetle.
Chilli	**Vegetative to flowering stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Apply irrigation every alternate day or use straw mulch for conserve soil moisture. ✦ Don't use split dose of any nitrogenous fertilizer for better growth. ✦ If possible use straw mulch/ grass mulch in row to prevent moisture loss and better growth of plant.
		Fruit fly	✦ In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.
Cowpea	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous

Phone: +91 3837 220041, Fax: +91 3837 220560,

			fertilizer for better growth.
Okra	**Vegetative stage**		✦ According to forecast probability of less rain and temperature will be high, so maintain soil moisture in the field properly. ✦ Earthing up soil for better growth and stability in root zone. ✦ Don't use split dose of any nitrogenous fertilizer for better growth.
Colocasia	**Sowing stage**		✦ Planting is done well prepared land or pits filled up with FYM (12-15) t/ha ✦ Sprouted corms or cormels are planted 5-7 deep at a spacing of 40-50 cm between and within rows in the pits. ✦ Inorganic fertilizer like Urea, SSP and MOP @ 220: 375: 134 kg.
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.
Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the

E-mail: kolasib.amfu@gov.in

			dry place to av oid fungal growth that releases aflatoxin which could lead to mortality of fish. Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.
