Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		▪ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ▪ Fish feed should be stored in cool and dry place to av ▪ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ▪ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ▪ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ▪ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

E-mail: kolasib.amfu@gov.in

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. - The young fruit plant must be irrigated at weekly interval for better establishment. - Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		- According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. - Farmers can go for tapping upto last week of January. - Make fire line around the field to save from fire. - Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		- Remove all weed plant from the selected place. - Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		▪ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ▪ Fish feed should be stored in cool and dry place to av ▪ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ▪ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ▪ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ▪ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		▪ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ▪ Fish feed should be stored in cool and dry place to av ▪ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ▪ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ▪ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ▪ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

GRAMIN KRISHI MAUSAM SEWA

ICAR RESEARCH COMPLEX FOR NEH REGION

Mizoram Centre, Kolasib- 796081, MIZORAM

(Prepared based on District wise Weather Forecast received from IMD, Guwahati)

District: Lawngtlai **Period:** 28 March – 01 April, 2018

Bulletin No: - 779/2018/ Bulletin/English **Date of issue:** 27th March, 2018

Parameters	28.03.2018	29.03.2018	30.03.2018	31.03.2018	01.04.2018
Rainfall (mm)	0	0	4	10	5
Max Temp (ºC)	31	31	31	31	31
Min Temp (ºC)	17	17	17	18	18
Cloud Coverage	Partially clear	Partially clear	Partially clear	Mainly cloudy	Partially clear
Max RH (%)	81	81	78	85	74
Min RH (%)	25	26	32	43	37
Wind Speed (KmpH)	3	2	2	2	3
***Wind Direction**	E	S-E	S-E	N-E	S

Northerly- N, North-Easterly- N-E, Easterly- E, South-Easterly- S-E, Southerly- S, South-Westerly- S-W, Westerly-W, North-westerly- N-W.

Status of Post Monsoon- February 1-28, 2018 (*Percent of deviation from normal in parenthesis*)

Aizawl- 5.40mm (20.78mm)	Champhai- 3.60mm (13.99mm)	Saiha- 0.00 mm (18.29mm)	Kolasib- 7.60mm (33.14mm)
Lawngtlai-4.00mm (19.52mm)	Lunglei-4.30mm (23.30mm)	Mamit-8.10mm (17.83mm)	Serchhip-4.10mm (14.39mm)

Weather summary of the past three days	Weather forecast valid from 28thMarch, 2018 To 01stApril, 2018.
Maximum Tem. (ºC): 30ºC **Minimum Tem. (ºC): 15-17ºC** **Maximum RH (%):81-89%** **Minimum RH (%):48-59%** **Wind Direction: Southeasterly** **Cloud cover: Partially clear** **Wind speed: 2-3 km/hr** **Rainfall: 04.3 mm**	There are chances of moderate to light rainfall during the next 3 days. The maximum and minimum temperatures for the next 5 days may range for 31ºC and 16-18ºC. Maximum relative humidity is expected in the range of 74-85% and minimum may from 26-43%. Wind direction would be easterly to southeasterly to northeasterly and southerly with the wind speed of 2-3 km per hour. Partially clear sky will prevail during the next five days. ***Weekly cumulative rainfall:*** **19.0 mm**
NDVI for Mizoram	 Mildly dry condition occurs in all districts of Mizoram.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		✦ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ✦ Fish feed should be stored in cool and dry place to av ✦ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ✦ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ✦ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ✦ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		▪ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ▪ Fish feed should be stored in cool and dry place to av ▪ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ▪ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ▪ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ▪ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		✦ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ✦ Fish feed should be stored in cool and dry place to av ✦ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ✦ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ✦ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ✦ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		▪ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ▪ Fish feed should be stored in cool and dry place to av ▪ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ▪ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ▪ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ▪ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.

Main Crop/ Animal /Fisheries	Stage	Cultural practices/ Pest/ Diseases	Agricultural / Horticultural/ animal husbandry advisories
FRUITS CROPS			
KHASI MANDARIN AND ACID LIME **STAR FRUIT** **PLUM AND PEACH**	**Flushing stage**		✦ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ✦ Pruning should involve removing unhealthy, unwanted and poorly positioned branches but minimise the loss of healthy foliage. ✦ The best time to prune is soon after harvest in winter to early spring before bud break. For late varieties where two crops may hang on the tree at once some of the new crop may be lost. ✦ Use Bordeaux paste or insecticide paste mixture to reduce the damage of white ant upto 4 feet height. ✦ Apply Bordeaux mixture to the plant after pruning. ✦ Application of split dose of fertilizer 600: 200:100 (g/pt).
		Gummosis, citrus canker, citrus greening and Dieback	✦ Due to low temperature and humidity disease appearance will more. Use Bordeaux past in tree trunk, twigs and branches protect healthy plant from soil borne disease.
PLANTATION CROP			
COFFEE	**Blooming stage**		✦ If day temperature and prolong dry spell occur it lead to Floral abnormalities like “Star Flower” in Arabica and “Pink Flower” in Robusta. ✦ Irrigation of plants at alternate day’s interval, 6 weeks before harvesting improves fruit retention and fruit development, and reduces fruit cracking and improves the fruit quality. ✦ Mulching should be done with dry

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			grasses near the tree base to conserve soil moisture during winter. ➢ The young fruit plant must be irrigated at weekly interval for better establishment. ➢ Foliar application of Mepiquat chloride @ 1000 PPM concentration or 0.75% SSP @ 1.5 g per 200 lt of water 15 days interval.
Rubber	**Vegetative stage**		➢ According to forecast and past weather record, there is no probability of rainfall. So weekly irrigation is required for upcoming week or use straw mulch reduces soil water loss. ➢ Farmers can go for tapping upto last week of January. ➢ Make fire line around the field to save from fire. ➢ Dig a pit (size 1.5 ft X 1.0 ft X 1.0 ft) between 4 plants. Store dried leaves in the pit and after 4 months it can use as manure.
Oil plam	**Vegetative/ Harvesting stage**		❖ Provide irrigation 10-15 days internal. ❖ Application of dry leaf mulch or paddy husk to a thickness of about 8 cm. in the basin keeps down the weed growth and decreases the number of irrigations and also improves fruit quality. ❖ Application of split dose of fertilizer 600: 200:100 (g/pt). ❖ Apply Bordeaux mixture to the plant after pruning. ❖ Fruits are harvested when they attain full size, develop attractive colour with optimum sugar and acid blend.
CEREALS AND PULSE CROPS			
Maize (*Jhum*)	**Sowing stage**		➢ Remove all weed plant from the selected place. ➢ Keep the plant, leaves and wood for dry.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant. ✦ Apply well decomposed FYM/pig manure @ 5-10 t/ha along with 80:60:40 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Rice (*Jhum*)	**Sowing stage**		✦ Remove all weed plant from the selected place. ✦ Keep the plant, leaves and wood for dry. ✦ Burn it when it will be dry. ✦ Open a furrow with the help of chimkhawi. ✦ Keep 4-5 seeds a hole. ✦ Distance should be maintain 60 cm from plant to plant.
VEGETABLE CROP			
Ginger and turmeric	**Sowing stage**		✦ Rhizome should be treated with Thiram @4 g/kg seed. ✦ Use optimum seed rate (50-60 kg/ha) for desire plant population. ✦ Apply well decomposed FYM/ pig manure @ 10-20 t/ha along with 120:80:60 kg N, P_2O_5 and K_2O/ha incorporate with soil before sowing. Half nitrogen dose will use at the time of sowing and remaining 25% after one month and 25% at flowering stage.
Onion	**Bulb formation stage**	**Poly house**	✦ Provide irrigation every alternate day due to non availability of rain. ✦ Intercultural operations should be done regularly to keep the crop free from weeds and better growth of bulb. ✦ Remaining quantity of nitrogen is

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

			applied 30-40 days after transplanting. Provide irrigation if water is require.
			Low temperature and high humidity influence the population of onion trips. Apply any systemic insecticide 1.5 ml/lt of water.
Capsicum	**Flowering to fruiting stage**	**Poly house**	Intercultural operations should be done regularly to keep the crop free from weeds and aeration of the root system. Harvest all mature fruits. Provide irrigation if water is require. Apply any systemic insecticide to reduce damage of chilli thrips.
Brinjal	**Fruiting to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Fruit and shoot borer attack will mare in dry weather. Apply any systematic insecticide for better cure. Harvest all mature fruit. Seed must be keep for next rabi season.
Chilli	**Vegetative to flowering stage**		According to forecast and past weather record, there is no probability of rainfall. So weekly twice irrigation is required for upcoming week or use straw mulch reduces soil water loss. Harvest all mature fruits. Apply split dose of nitrogenous fertilizer to the plant. Mature fruit should be harvested and
		Fruit fly	In large gardens apply carbaryl 0.2 per cent or malathion 0.15 per cent suspension containing sugar or jeggery at 10 g/l at fortnightly intervals at flowering and fruit initiation.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Potato	**Harvesting stage**		✦ If the leaves and plant became dry it means plant ready for harvesting. ✦ Open the furrow with the help of spade, harvest all mature tubers. ✦ Discard all mother tubers from harvested potato tubers. ✦ Keep 7 -10 days for drying or reduce the moisture level in shed dry. ✦ Keep 25% seed for next season sowing.
Cowpea	**Sowing stage**		✦ Plough the field properly, at least 2-3 times. ✦ Mix fertilizer with FYM 50:60:60Kg /ha. ✦ Sow 2-3 seed per whole. ✦ Spacing should be 30 X 20 cm.
Okra	**Sowing stage**		✦ Plough the field with the help of spade. ✦ Sow 2 seed 45 X 45 cm spacing. ✦ Before sowing seed provide one or two irrigation. ✦ Provide fertilizer @ 120: 60: 60 Kg/ha
ANIMAL HUSBENDARY			
Pig	**All stages**		✦ Animals must keep in dry place or kept in alleviated area and dry bedding (straw) to be provided to young animals. ✦ 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision against FMD. ✦ Reduce concentrate diet up to 5%. ✦ Provide adequate potable water. ✦ In present weather conditions vaccinate against swine fever (Vaccines available in State Veterinary Departs)
		Porcine Reproductive Respiratory Syndrome (PRRS).	1. Culling of positive pigs or piglets.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

Cattle	**All age group**		✦ In present weather conditions, special care should be taken against attack of maggots in the wounds of animals. Application of turpentine oil in the wounds followed by application of antibiotics for five days is advised. ✦ Provide UMB/Molases if possible in the feed ✦ Provide 10-30 ml of vitamin B-Complex in feed ✦ 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision. ✦ Separate sick animals. ✦ The animal should be washed with lukewarm water added with little potash (KMnO4) or neem leaves. ✦ Long hair near the udder/stomach/back legs should be teamed short.
Poultry	**All age group**		✦ Provide preventive dose of anti-coccidial drugs to poultry. ✦ Proper ventilation of shed. ✦ Provide glucose/electral along with vitamin supplements (@5- 6ml/100 birds) with adequate potable water ✦ Avoid overcrowding. ✦ Provide broad-spectrum antihelminthic drugs under vet supervision and recommended doses. ✦ Vaccination as per the schedule with proper consultation with vet. ➢ Day old chick: HVT Marek disease vaccine, 4-7 days:¬ F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. ✦ Remove wet litter.

Phone: +91 3837 220041, Fax: +91 3837 220560,
E-mail: kolasib.amfu@gov.in

FISHERY			
	Monitoring of fish in pond		✦ Care should be taken that fish are fed with feed that are free from fungus. If the fungal growth is observed in fish feed, the feed needs to be sundried for few days prior to feeding. ✦ Fish feed should be stored in cool and dry place to av ✦ oid fungal growth that releases aflatoxin which could lead to mortality of fish. ✦ Fish harvesting may be carried out by complete dewatering of pond. After dewatering, the pond may be prepared for the next cycle by sundrying of bottom, applying lime, manure, fertilizers etc. ✦ Fish needs to be monitored regularly to observe any sign of diseases and if disease is observed, consult expert immediately and water sample needs to be analyzed. ✦ Immediate measure of application of lime and potassium permanganate @50kg/ha and 1.5mg/l respectively in the pond helps in avoiding fish mortality.
