

Integrated Agromet Advisory Service Bulletin from 29th Oct to 2nd Nov'16 Zunheboto District

			Bulletin N0:80/2010
Weather summary of the preceding week			Weather forecast valid upto 2 nd Nov 16
Light rain occurred the past week			■ Probability of Light rain the coming week.
	and minimum tempe		■ Max temp is likely to be 29° C - 30° C and the min temp 18° C to 20° C
29°C to 31°C	$^{\circ}$ C and 18^{0} C to 20^{0} C,	respectively.	Sky is likely to be mainly cloudy the coming week
■ Relative hur	midity varied from 39	9% to 93%.	■ Relative Humidity is likely to range from 42% to 95%.
Wind speed	ranged from 1 to 2	kmph	■ Wind speed may reach upto 1-2 kmph
			■ Wind direction will be mostly easterly
Main Crops	Stage	Pest/	Agro-meteorological Advisories
•		Diseases	
			Field crops
	Und	ertake timely ha	arvest of kharif crops with safe storage of produce.
Seed treatme	ent with fungicides (@ 2 to 3 g/kg so	eed) prevents seed borne diseases, promotes better germination and crop stand
		leading	to higher productivity in all rabi crops
TRC/WRC	Ripening stage	-	Avoid excessive drying of paddy to avoid breakage of the grains.
paddy			Follow sanitation during drying, milling and after milling to avoid
			contamination of grains and protect from insects, rodents and birds
Toria	Land preparation	-	Field preparation should be started for toria and arrangement for quality
			seeds should be done. M-27, TS-36 and TS-38 are some of the varieties
			recommended for our region
Rabi maize	Land preparation		Land preparation should be started for rabi maize. It can be grown in all
			types of soils having adequate provision of drainage. Field should be
			ploughed properly so as to expose the pupae of red hairy caterpillar. Sow
			certified seeds from a reliable source to prevent seed rot and seedling blight.
			If one wants to use his own seed, seed treatment is a must.
			Some of the varieties recommended for our region are HQPM-1, Allrounder
			and RCM-76.
			Horticultural crop
Spread well			per hectare for the main field and mix it well in the soil by cultivating the field.
~	Keep		by collecting the stubbles and unwanted materials.
Citrus		Leaf miner	Proper management should be done for leaf miner.
			Monitor pest regularly, manage ants and whitewash of the trunk should be
			done.

	Vegetables	Nursery preparation should be started for vegetables like cabbage, cauliflower, knolkhol, broccoli, radish, tomato and arrangement for quality seeds should be done. Suitable varieties for our region: 1. Cabbage – Green express (Hybrid), Rareball (Hybrid), Pride of India (OP). 2. Broccoli – Pushpa, princess.		
		3. Tomato – Pusa ruby, Arka vikash, Punjab swari. 4. Knolkhol – White Vienna. 5. Radish – Japanese white, Pusa chetki. 6. Pea – Arkel		
	Poultry	Prevailing high humidity may cause ammonia fumes which irritate the respiratory tract and eyes of the poult Good ventilation provides a comfortable environment without draft. Farmers are advised to provide cle drinking water round the clock and water troughs/ feeders should be regularly cleaned. Antibiotics or other street medications may be added to water if desired.		
	Piggery	Routine vaccination programme is recommended and once any disease is diagnosed treat immediately with antibiotics.		
ніф'янці ІСА R	Fishery	Organic manure/ cattle manure may be applied @ 2 ton per ha to maintain the natural productivity of the ponds. To avoid losses, avoid application of manure at maximum water depth.		

Integrated Agromet Advisory Service Bulletin from 29th Oct to 2nd Nov'16 Dimapur District

			Bulletin No:86/2016
Weather	summary of the prece	eding week	Weather forecast valid upto 2 nd Nov'16
 Light rain occurred the past week Maximum and minimum temperatures ranged 29°C to 30°C and 19°C to 21°C, respectively. Relative humidity varied from 42% to 95%. Wind speed ranged from 1 to 2 kmph 			 Probability of light rain the coming week. Max temp is likely to be 28°C - 29°C and the min temp 18°C to 20°C Sky is likely to be mainly cloudy the coming week Relative Humidity is likely to range from 43% to 95%. Wind speed may reach upto 1-2 kmph Wind direction will be mostly easterly
