WEATHER FORECAST BASED AGROMET ADVISORIES					
General Advisories: <ul style="list-style-type: none">					
Main crop	Growth Stage	Pest/Disease	Weather based Agro-Advisories		
TRC/WRC paddy	Harvesting to threshing stage		Keeping weather in view, harvesting and threshing should be postpone		
Toria/Mustard	Flowering stage	-	Daily monitoring should be done for pest and disease infestation		
Rabi maize	Tasseling stage		Light hoeing should be done when necessary for better control of weeds		
Assam lemon			Weeding should be done frequently. Daily monitoring should be done for aphid		
Cabbage	Pre cupping stage		Constant monitoring of leaf feeders in cole crop is advised		
Broccoli	Head initiation stage		Shallow hoeing should be done to remove weeds, a light earthing-up at final hoeing is beneficial.		
Radish, carrot	Harvesting stage		Timely harvesting should be carried out		
Poultry	As the temperature is dropping, provide vitamin complex. Get ready to provide warmth by use of incandescent bulbs to protect them from cold winds by use of plastic sheets, jute sacks and plastic sacks				
Piggery	Protect the animals from cold draft using gunny bags and other locally available materials Provide protein rich ration and ad libitum clean drinking water				
Fishery	If the pond has minimum 1m depth water, apply lime @ 50kg/bigha along with raw cow dung @ 125 kg/bigha, Urea 3.5 kg/bigha, SSP 2.7 kg /bigha. If water depth is less than 1m harvest 50% of the stocked fish

WEATHER FORECAST BASED AGROMET ADVISORIES

General Advisories:

Main crop	Growth Stage	Pest/Disease	Weather based Agro-Advisories
TRC/WRC paddy	Threshing stage		<i>Keeping weather in view, threshing should be carried out this week</i>
Toria/Mustard	Flowering stage	Aphids	<i>In the present weather proper monitoring should be done for aphids</i>
Rabi maize	Tasseling stage		<i>Light hoeing should be done when necessary for better control of weeds</i>
Cabbage	Pre Cupping stage	Diamond back moth	<i>In the present weather daily monitoring should be done for cabbage caterpillar.</i>
Radish, turnip, Carrot	Maturing stage		<i>As roots have a tendency to protrude above soil surface, earthing up should be done immediately after weeding.</i>
Pea, Rajmash	Vegetative stage		<i>Keeping weather in view, weeding should be done as and when necessary</i>
Tomato	Vegetative stage		<i>To protect the fruits from bruises and soil borne diseases, make arrangement for staking and trellis of the plant</i>
Poultry	Chickens showing flu like symptoms should be treated with antibiotic Vendox, N-dox powder. For prevention it should be given for three days and for treatment give for 5 to 7 days.		
Piggery	Provide high energy feeds like maize + wheat bran during cold days		
Fishery	As far as possible do not disturb the pond. Prune the tree branches along the pond embankment and allow enough sunlight to fall on the pond water surface

WEATHER FORECAST BASED AGROMET ADVISORIES			
General Advisories: Timely intercultural operations in vegetables are advised			
Main crop	Growth Stage	Pest/Disease	Weather based Agro-Advisories
<i>TRC/WRC paddy</i>	Storage		<i>Before storing of rice grains in storage, grains should be dried properly to bring down moisture level below 12%. Godowns should be thoroughly cleaned to destroy any insect-pests hiding in the creeks and crevices and dried before storing grains.</i>
<i>Potato</i>	Vegetative stage		<i>Try to avoid any stress to the crop as much as possible. Collect and destroy disease infected and insect infested plant parts</i>
<i>Toria/Mustard</i>	Flowering stage	-	<i>Daily monitoring should be done for pest and disease infestation</i>
<i>Pea</i>	Vegetative stage		<i>Proper staking should be done</i>
<i>Rabi maize</i>	Tasseling stage		<i>Plants should be earthen up after every weeding.</i>
<i>Radish</i>	Harvesting stage		<i>Timely harvesting should be carried out</i>
<i>Rajmash</i>	Podding stage		<i>In the present weather condition, proper mulching should be done. Collect and destroy disease infected and insect infested plant parts if there is any</i>
<i>Poultry</i>			Chicks and brooding chicks should be provided warmth by use of incandescent bulbs and protection from cold winds by use of plastic sheets, jute sacks and plastic sacks Provide vitamin complex during sudden drop of temperature
<i>Piggery</i>			Get ready with provision of warmth for piglets during cold days in the upcoming winter with incandescent bulbs and wind breaks made from sack or plastic sheets
<i>Fishery</i>			If the water level is very low, partially harvest some of the stocked fishes
