WEATHER FORECAST BASED AGROMET ADVISORIES

General Advisories: Sky will be clear.

Intercultural operations in vegetables are advised to remove the weeds

Main crop	Growth Stage	Pest/Disease	Weather based Agro-Advisories
TRC/WRC paddy	Harvesting stage		<i>Keeping weather in view, after harvesting, crop should be dried in the field for 2-3 days and thereafter threshing should be done</i>
Toria/Mustard	Vegetative stage	Aphids	<i>In the present weather proper monitoring should be done for aphids</i>
Rabi maize	Vegetative stage		<i>Light hoeing should be done when necessary for better control of weeds</i>
Cabbage	6 – 8 leaf stage	Diamond back moth	<i>In the present weather daily monitoring should be done for cabbage caterpillar.</i>
Radish, turnip, Carrot	Vegetative stage		<i>As roots have a tendency to protrude above soil surface, earthing up should be done immediately after weeding.</i>
Pea, Rajmash	Vegetative stage		<i>Keeping weather in view, weeding should be done as and when necessary</i>
Tomato	Vegetative stage		<i>To protect the fruits from bruises and soil borne diseases, make arrangement for staking and trellis of the plant</i>
Poultry	Chickens showing flu like symptoms should be treated with antibiotic Vendox, N-dox powder. For prevention it should be given for three days and for treatment give for 5 to 7 days.		
Piggery	Provide high energy feeds like maize + wheat bran during cold days		
Fishery	As far as possible do not disturb the pond. Prune the tree branches along the pond embankment and allow enough sunlight to fall on the pond water surface

WEATHER FORECAST BASED AGROMET ADVISORIES			
General Advisories: Intercultural operations in vegetables are advised to remove the weeds			
Main crop	Growth Stage	Pest/Disease	Weather based Agro-Advisories
TRC/WRC paddy	Storage		Before storing of rice grains in storage, grains should be dried properly to bring down moisture level below 12%. Godowns should be thoroughly cleaned to destroy any insect-pests hiding in the creeks and crevices and dried before storing grains.
Potato	Vegetative stage		Try to avoid any stress to the crop as much as possible. Collect and destroy disease infected and insect infested plant parts
Toria/Mustard	Vegetative stage	-	Daily monitoring should be done for pest and disease infestation
Pea	Vegetative stage		Timely weeding and earthing up should be done
Rabi maize	Vegetative stage		Plants should be earthed up after every weeding.
Radish	Vegetative stage		In the present condition, earthing up should be done for proper development of roots. Radish has a tendency to bulge out of soil as it grows in size. Therefore, thorough covering by earthing up is recommended to produce quality roots
Rajmash	Flowering stage		In the present weather condition, proper mulching should be done. Collect and destroy disease infected and insect infested plant parts if there is any
Poultry			Chicks and brooding chicks should be provided warmth by use of incandescent bulbs and protection from cold winds by use of plastic sheets, jute sacks and plastic sacks Provide vitamin complex during sudden drop of temperature
Piggery			Get ready with provision of warmth for piglets during cold days in the upcoming winter with incandescent bulbs and wind breaks made from sack or plastic sheets
Fishery			If the water level is very low, partially harvest some of the stocked fishes
