WEATHER FORECAST BASED AGROMET ADVISORIES					
General Advisories: Sky will be clear the coming days. Sowing and transplanting should be carried out					
Main crop		Growth Stage	Pest/Disease	Weather based Agro-Advisories	
Jhum Paddy		Storage	Stored grain rice weevil	Weather is favourable for development of rice weevil. Proper monitoring should be done Disinfect the storage properly. Keeping neem leave and branches over the stored rice help in controlling the pest	
TRC/WRC paddy		Milk development stage	Blast	For rice blast management, destroy the infested residue, stubbles, grass and weeds present in the bunds of the field as they act as a source for the infection Postpone Spraying of carbendazim@1.0 g/lit this week as there is probability of rain.	
Soybean		Podding stage	Leaf miner	In the present weather proper monitoring should be done for Leaf miner	
Toria/Mustard		Sowing	-	As there is possibility of clear sky, sowing should be done	
Rabi maize		Sowing		As there is possibility of clear sky, sowing should be done	
Assam lemon				Weeding should be done frequently. Daily monitoring should be done for aphid.	
Vegetables Cabbage, tomato, radish, brocolli		Nursery		Prepare the main field for transplanting of the vegetables. Bunds, channels, uncultivated fields and field roads should be cleaned, by removing weeds.	
Poultry		Sick bird should be immediately separated/ culled from healthy flock.			
Piggery		Observe their general stage of health, check for parasites and injuries, and watch out for any abnormal feeding habits			
Fishery		Prune tree branches around the pond so that leaves do not fall on water.

WEATHER FORECAST BASED AGROMET ADVISORIES					
General Advisories: Sky will be clear the coming days. Sowing and transplanting should be carried out					
Main crop		Growth Stage	Pest/Disease	Weather based Agro-Advisories	
Jhum Paddy		Harvesting stage		Grains should be properly dried to right moisture level before storing. Godowns should be properly cleaned by removing all the grains and other storage matter of previous crop.	
TRC/WRC paddy		Milk development stage	Blast	For rice blast management, destroy the infested residue, stubbles, grass and weeds present in the bunds of the field as they act as a source for the infection Postpone the Spray of carbendazim@1.0 g/lit this week as there is possibility of rain. Repeat the spray at 15 days interval based on the severity of disease	
			Gundhi bug	Feeding causes empty or small grains during the milking stage. At the soft present stage, feeding will cause deformed or spotty grains. Do proper surveillance of the field.	
Soybean		Podding stage	Leaf miner	In the present weather proper monitoring should be done for Leaf miner	
Toria/Mustard		Sowing	-	Sowing should be carried out this week as there is probability of clear sky the coming days	
Rabi maize		Sowing		Sowing should be carried out this week as there is probability of clear sky the coming days	
Cabbage		Trasnplanted		Gap filling should be carried out if any has been missed out	
Radish, turnip, tomato, Brocolli, Carrot		Transplanting		In the present weather, transplanting should be carried out if the main field is ready.	
Pea, Rajmash		Sowing		As there is possibility of clear sky, sowing should be done. Use only certified seeds. Before sowing seeds should be treated with fungicides	
Poultry		Sick bird should be immediately separated/ culled from healthy flock.			
Piggery		Observe their general stage of health, check for parasites and injuries, and watch out for any abnormal feeding habits			
Fishery		Prune tree branches around the pond so that leaves do not fall on water
