WEATHER FORECAST BASED AGROMET ADVISORIES					
General Advisories					
Main crop		Growth Stage	Pest/Disease	Weather based Agro-Advisories	
TRC/WRC paddy		Storage		Keep storage areas, crevices, wooden pallets etc clean by spraying with the recommended insecticide to disinfect insect breeding places. Place sticky traps in the drying and storage areas for rats	
Toria/Mustard		Podding stage	-	Left over weeds before shading of seeds may be removed to reduce the weed seed bank/spread.	
Assam lemon				Weeding should be done frequently. Daily monitoring should be done for aphid	
Cabbage		Maturing stage		The crop is ready for harvest and should be done timely as it may split if not harvested in time.	
Winter vegetables		Harvesting stage		Timely harvesting should be carried out	
Poultry		Protect the birds from cold draft by covering the exposed windward areas using gunny bags and other locally available materials Deworm the birds once every 2 months Sick birds showing respiratory distress, drooping of head or any other illness should be promptly segregated and the entire flock be treated against the illness.			
Piggery		Sick or injured animals should be attended to immediately, preferably move to a warm comfortable environment. Medications should be used only on the advice of a veterinarian, following recommended treatment			
Fishery		As the water temperature of your pond falls, the fish will require less food. Never over feed your fish. Excess food will pollute the pond water, so only feed amounts that will be completely consumed by your fish within 2 minutes

WEATHER FORECAST BASED AGROMET ADVISORIES

General Advisories: In view of falling both maximum and minimum temperature, Farmers are advised for light irrigation at evening time to protect the crop from probable frost.

Main crop	Growth Stage	Pest/Disease	Weather based Agro-Advisories
TRC/WRC paddy	Storage		<i>Storage rooms should be physically rodent and bird proof, if possible, place sticky traps in the drying and storage areas for rats.</i>
Toria/Mustard	Maturing stage		<i>In the present weather, as soon as the pods turn yellowish-brown, harvest the crop in order to avoid losses. Cleaned seed must be dried in the sun for four to five days</i>
Cabbage	Cupping stage		<i>Daily monitoring should be done for pest and diseases</i>
Radish, turnip, Carrot	Harvesting stage		<i>In the present weather, timely harvesting should be done</i>
Pea, Rajmash	Flowering stage		<i>Keeping weather in view, weeding should be done as and when necessary</i>
Tomato	Flowering stage		<i>To protect the fruits from bruises and soil borne diseases, make arrangement for staking and trellis of the plant</i>
Poultry	Protect the birds from cold draft by covering the exposed windward areas using gunny bags and other locally available materials Deworm the birds once every 2 months Sick birds showing respiratory distress, drooping of head or any other illness should be promptly segregated and the entire flock be treated against the illness.		
Piggery	Sick or injured animals should be attended to immediately, preferably move to a warm comfortable environment. Medications should be used only on the advice of a veterinarian, following recommended treatment		
Fishery	As the water temperature of your pond falls, the fish will require less food. Never over feed your fish. Excess food will pollute the pond water, so only feed amounts that will be completely consumed by your fish within 2 minutes
