

PROFORMA FOR SUBMISSION OF INFORMATION ON TECHNOLOGIES DEVELOPED

1. Name of Machinery/ Product/ Variety, developed: **Adjustable Row Marker**
2. Application/ Use (Maximum 2 line): **Marking rows for line sowing.**
3. Description/ Features of the Machinery/ Product/ Variety developed along with one good coloured photograph (Maximum 100 words):

Adjustable Row Marker

This device is used to mark rows on seed bed for maintaining row to row distance while using single row seeding devices. It has three markers fitted on a sliding bar and the distance between any two makers can be adjusted between 20-60 cm according to row spacing requirement of the crop.

4. Input (Equipment/ plant and machinery/ raw material/land/investment/ man power/ power needed): **Single Person**
5. Output capacity: **0.1 to 0.2 ha/h**
6. Specific benefits and impact: **The device helps ensure row-to-row spacing while using single row seeding devices.**
7. Unit cost: **Rs. 480/-**
