

PROFORMA FOR SUBMISSION OF INFORMATION ON TECHNOLOGIES DEVELOPED

1. Name of the machinery/product/variety developed: tomato varieties **Manikhamnu, Manileima and Manithoibi**
2. Application/use (maximum 2 line): **For cultivation in Rice based cropping system**
3. Description/features of the machinery/product/variety developed along with one good colored photograph (maximum 100 words)

MANIKHAMNU	MANILEIMA	MANITHOIBI
		
Yield: 533 q/ha	Yield : 630 q/ha. Released by AICRP on Vegetable crops in the year 2004 for zone III (entire North east and Andaman & Nicobar Island.	Yield: 637 q/ha.
<ul style="list-style-type: none"> ➤ Early maturing. (85-90 days) ➤ Tolerance to fruit cracking and moisture stress. ➤ Fruits are medium size, round and smooth with 2-3 locules. ➤ Flesh is thick and juicy, suitable for processing and fresh consumption purposes. ➤ These varieties have been recommended for rice based cropping system during spring summer season ➤ These varieties has been released by State Variety Release Committee, Manipur in the year 2000 		

4. Input (equipment/plant and machinery/raw material/land/investment/man power/power needed): **Seeds of the varieties**
5. Output capacity : **Yield 533-637 q/ha**
6. Specific benefit and impact : **High yielding varieties for hilly region under Rice based cropping system**
7. Unit cost: **2000 per kg**
